## About Our Lumber:

All of our wood is harvested locally. Small amounts of rare woods come from various properties, and all large bulk amounts come from properties under strict forest management plans. All of our wood is from New Jersey, New York, and Pennsylvania, with the exception of our Southern Yellow Pine, which comes from one of our personal properties in Virginia.

All lumber is sold by the board foot (144 cubic inches). Board Footage is calculated by thickness x width x lengths (all in inches) divided by 144 (for 144 inches per board foot)
